prontolind®

PERFECT CARE FOR ALL
YOUR PIERCINGS!

PRONTOLIND-PRODUCTS

- provide protection against infection and fast healing due to the unique polyhexanide-betain complex
- can be used all over the body without pain or burning, also in the intimate and mucous membrane area
- protect skin and mucous membranes without irritating or drying them out
- are safe to use for a long period of time, unlike many other aftercare products
- are also suitable for daily care and cleaning of jewellery and pierced areas even after the healing period
- are free of alcohol, phenols and fragrances and therefore ideal for allergy sufferers

Spray 75ml

The spray has a wide range of applications. It cleans and cares the skin even after the healing period. It penetrates into the canaliculus on its own, in pierced areas that are difficult to reach. Prontolind® Spray is specially developed for piercing care and is suitable for all types of piercings..

Mouth rinse 250ml

The mouth rinse promotes healing after tongue and lip piercings and is completely free of harmful ingredients such as chlorhexidine or alcohol. It is also very suitable for daily dental care.

Gel 10ml

The gel adheres very well to nose and ear piercings and is ideal if a dressing protects the fresh piercing (e.g. body modifications). For fleshtunnels it is a great lubricant and avoids odour. Furthermore it is - combined with the Prontolind® foam - ideal for infection prophylaxis during tattooing.

Mouth spray 75ml

Antibacterial care for all oral piercings. Prevents inflammation and promotes healing. The mouth spray ensures deep hygiene and fresh breath. The refreshment in practical pocket format.

Tattoo Foam 100ml

The care foam protects and regulates the tattooed skin during the healing period and afterwards. Caring panthenol improves the skin's appearance and supports regeneration. The resulting protective film on the skin ensures long-lasting antimicrobial safety.

Solution 20ml

With the solution piercings are cleaned, moistened and maintained as usual.
